Kaggle

Description

Kaggle is an online platform for data science and machine learning. It provides datasets, coding notebooks, competitions, and tutorials. Users can write and run Python code directly in the browser without installing any software.

Features

- Free cloud-based notebooks
- Access to thousands of public datasets
- Supports Python and R programming
- GPU and TPU support for faster computation
- Easy sharing and collaboration
- Machine learning competitions and learning courses

How to Access Kaggle

1. Open a web browser.
2. Go to <https://www.kaggle.com>.
3. Click **Sign Up** or **Log In**.
4. Create a new notebook by clicking **Code** → **New Notebook**.

Jupyter Notebook

Description

Jupyter Notebook is an open-source application used for writing and running code, especially in Python. It allows users to combine code, text, equations, charts, and images in one document, making it ideal for data analysis and learning.

Features

- Interactive coding environment
- Supports multiple programming languages
- Displays graphs and visualizations
- Easy to document code with text and images
- Runs on your local computer

How to Download and Install Jupyter Notebook

1. Open a web browser.
2. Visit <https://jupyter.org>.
3. Install Python from <https://www.python.org> if it is not already installed.
4. Open Command Prompt or Terminal.
5. Run the following command:
pip install notebook
6. After installation, start Jupyter Notebook by typing:
jupyter notebook

Google Colab

Description

Google Colab (Google Colaboratory) is a free cloud-based notebook service provided by Google. It allows users to write and run Python code directly in the browser without installing any software.

Features

- Free cloud-based notebooks
- Built-in GPU and TPU support
- Automatic saving to Google Drive
- Easy collaboration with others
- Supports Python programming

How to Access Google Colab

1. Open a web browser.
2. Go to <https://colab.research.google.com>.
3. Sign in with your Google account.
4. Click **New Notebook** to start coding
